

# BMP Inspection - Weekly

Date: 2022-05-06 Time: 09:27 Date Rain Predicted to Occur: 5/6/2022 Predicted % Chance of Rain: 15% Total Rainfall: in

Stormwater Sampling Agent: Neil Trenergy, Risk Consultant

WDID Number: 2 41C380307

Site Name:  Builder:  City:  Zip Code:

Job Site Contact:  Company:  Job Site Phone:

## Rain Gauge

Rain gauge reading and location (in)

Time since last storm

Last storm duration

## Site Information

Construction stage and completed activities

Approximate area of site that is exposed

## Exemption Documentation

(explanation required if inspection could not be conducted)  
Visual inspections are not required outside of business hours or during dangerous weather conditions such as flooding or electrical storms.

## NOAA Weather Data

## Observations

### Good Housekeeping for Construction Materials

<input type="radio"/> Inventory of products (excluding materials designed to be outdoors)	Y	N	N/A
<input type="radio"/> Stockpiled construction materials not actively in use are covered and bermed	Y	N	N/A
All chemicals are stored in watertight containers with <input type="radio"/> appropriate secondary containment, or in a completely enclosed storage shed	Y	N	N/A
<input type="radio"/> Construction materials are minimally exposed to precipitation	Y	N	N/A
<input type="radio"/> BMPs preventing the off-site tracking of materials are implemented and properly effective	Y	N	N/A

### Good Housekeeping for Waste Management

<input type="radio"/> Wash/rinse water and materials are prevented from being disposed into the storm drain system	Y	N	N/A
<input type="radio"/> Portable toilets are contained to prevent discharges of waste	Y	N	N/A
<input type="radio"/> Sanitation facilities are clean and with no apparent leaks or spills	Y	N	N/A
<input type="radio"/> Equipment is in place to cover waste disposal containers at the end of business day and during rain events	Y	N	N/A
Discharges from waste disposal containers are prevented <input type="radio"/> from discharging to the storm drain system / receiving water	Y	N	N/A
<input type="radio"/> Stockpiled waste material is securely protected from wind and rain if not actively in use	Y	N	N/A
<input type="radio"/> Procedures are in place for addressing hazardous and non-hazardous spills	Y	N	N/A
<input type="radio"/> Spill response in place	Y	N	N/A
<input type="radio"/> Equipment and materials for cleanup of spills is available onsite	Y	N	N/A
Washout areas (e.g., concrete) are contained <input type="radio"/> appropriately to prevent discharge or infiltration into the underlying soil	Y	N	N/A

### Good Housekeeping for Vehicle Storage and Maintenance

Measures are in place to prevent oil, grease, or fuel from <input type="radio"/> leaking into the ground, storm drains, or mixing with surface waters	Y	N	N/A
<input type="radio"/> All equipment or vehicles are fueled, maintained, and stored in a designated area with appropriate BMPs	Y	N	N/A

Vehicle and equipment leaks are cleaned immediately and disposed of properly

Y	N	N/A
---	---	-----

### Good Housekeeping for Landscape Materials

Stockpiled landscape materials such as mulches and topsoil are contained and covered when not actively in use

Y	N	N/A
---	---	-----

Erodible landscape material has not been applied 2 days before a forecasted rain event or during an event

Y	N	N/A
---	---	-----

Erodible landscape materials are applied at quantities and rates in accordance with manufacturer recommendations

Y	N	N/A
---	---	-----

Bagged erodible landscape materials are stored on pallets and covered

Y	N	N/A
---	---	-----

### Good Housekeeping for Air Deposition of Site Materials

Good housekeeping measures are implemented onsite to control the air deposition of site materials and from site operations

Y	N	N/A
---	---	-----

### Non-Stormwater Management

Non-Stormwater discharges are properly controlled

Y	N	N/A
---	---	-----

Vehicles are washed in a manner to prevent non-stormwater discharges to surface waters or drainage systems

Y	N	N/A
---	---	-----

Streets are cleaned in a manner to prevent unauthorized non-stormwater discharges to surface waters or drainage systems.

Y	N	N/A
---	---	-----

### Erosion Controls

Wind erosion controls are effectively implemented

Y	N	N/A
---	---	-----

Effective soil cover is provided for disturbed areas inactive (i.e., not scheduled to be disturbed for 14 days) as well as finished slopes, open space, utility backfill, and completed lots

Y	N	N/A
---	---	-----

The use of plastic materials is limited in cases when a more sustainable, environmentally friendly alternative exists.

Y	N	N/A
---	---	-----

## Sediment Controls

Perimeter controls are established and effective at controlling erosion and sediment discharges from the site

Y	N	N/A
---	---	-----

Entrances and exits are stabilized to control erosion and sediment discharges from the site

Y	N	N/A
---	---	-----

Sediment basins are properly maintained

Y	N	N/A
---	---	-----

Linear sediment control along toe of slope, face of slope and at grade breaks

Y	N	N/A
---	---	-----

Limit construction activity to and from site to entrances and exits that employ effective controls to prevent offsite tracking

Y	N	N/A
---	---	-----

Ensure all storm, drain inlets and perimeter controls, runoff control BMPs and pollutants controls at entrances and exits are maintained and protected from activities that reduce their effectiveness

Y	N	N/A
---	---	-----

Inspect all immediate access roads daily

Y	N	N/A
---	---	-----

## Run-On and Run-Off Controls

Run-on to the site is effectively managed and directed away from all disturbed areas.

Y	N	N/A
---	---	-----

## Other

Are the project SWPPP and BMP plan up to date, available on-site and being properly implemented?

Y	N	N/A
---	---	-----

## Deficiencies Noted

Deficiency	Action	Notes
------------	--------	-------

## Additional Information

### Additional Corrective Actions Required

Identify additional corrective actions not included above. Note if SWPPP change is required.
